DETAILED ACTION

Election/Restriction

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claim 1, drawn to a method of recombining a first desired nucleic acid and a first vector to produce a first product nucleic acid where the first vector and the first desired nucleic acids each contain recombination sites which do not recombine with each other, then recombining the first product nucleic acid with a second vector, where the second vector and the first product nucleic acid each contain recombination sites which do not recombine with each other, to produce a second product nucleic acid, classified in class 435, subclass 462.
 - II. Claims 52-68, drawn to a method of ligating one or more recombination site adaptors onto a linear nucleic acid, and recombining the adapted linear nucleic acid with a vector, classified in class 435, subclass 91.41.
2. The inventions are distinct, each from the other because of the following reasons:

Inventions of Groups I and II are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions of Groups I and Group II are biologically and functionally different and distinct from each other and thus one does not render the other obvious. The methods of Groups I and II

Art Unit: 1636

comprise steps which are not required for or present in the methods of the other group:

recombining the first product nucleic acid with a second vector of Group I and ligating one or more recombination site adaptors onto a linear nucleic acid of Group II. Thus, the operation, function and effects of these different methods are different and distinct from each other.

Therefore, the inventions of these different, distinct groups are capable of supporting a separate patents.

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

4. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

5. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Conclusion

6. Certain papers related to this application are *welcomed* to be submitted to Art Unit 1636 by facsimile transmission. The FAX numbers are (703) 308-4242 and 305-3014. The faxing of such papers must conform with the notices published in the Official Gazette, 1156 OG 61 (November 16, 1993) and 1157 OG 94 (December 28, 1993) (see 37 CFR 1.6(d)). NOTE: If applicant *does* submit a paper by FAX, the original copy should be retained by the applicant or applicant's representative, and the FAX receipt from your FAX machine is proof of delivery. NO DUPLICATE COPIES SHOULD BE SUBMITTED, so as to avoid the processing of duplicate papers in the Office.

Any inquiry concerning this communication or earlier communications should be directed to Dr. William Sandals whose telephone number is (703) 305-1982. The examiner normally can be reached Monday through Thursday from 8:30 AM to 7:00 PM, EST. If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Remy Yucel can be reached at (703) 305-1998.

Any inquiry of a general nature or relating to the status of this application should be directed to the William Phillips, whose telephone number is (703) 305-3482.
